Objective

Ruby developer who can create rich experiences with an ability to ship functionality in a timely manner seeking an entry-level web development position.

Experience

STUDENT, TECH TALENT SOUTH, FULL TIME CODE EMERSION CLASS – JANUARY 2017 - MARCH 2017

This was a deep immersion program into Ruby and Rails. In this class, my classmates and I worked as a team and individually to build various projects such as blogs, e-commerce sites, social media sites, location and weather apps. Using Ruby on Rails, we incorporated HTML, CSS, and various Javascript libraries into our applications to quickly create business value and rich user experiences.

STUDENT, GIRL DEVELOP IT, INTRODUCTION TO RUBY – JULY 2016 - NOVEMBER 2016

This was an introduction course to the Ruby language, taught and hosted by several notable women developers in Atlanta. We met once a week for several weeks and explored the fundamentals of the Ruby language and ecosystem. We then wrote various applications based on our lessons to help us get a strong understanding of the material

SERVER, HOME GROWN, ATLANTA, GA – 2015-2017

Because of my background in the hospitality industry, I helped lead a waitstaff team and was a constant top-performer in maximizing up-sales, table turnover, order accuracy and guest satisfaction.

BARTENDER, PAPER PLANE, ATLANTA, GA – 2013-2015

As an employee new to a fine dining atmosphere, I advanced quickly to a top-performing position. I memorized and was able to recall intricate details of finely prepared food and beverages. I helped lead guest experiences and increased sales by being attentive, professional and knowledgeable.
